Investment Objective

The ROI Fund's investment objective is to provide investors with yield as well as long-term capital gains by making debt and equity investments in a diversified portfolio of small- and medium-sized eligible businesses as required to meet the pacing requirements of the Fund. The ROI Fund also invests a certain portion of its assets in "reserves" that has the meaning ascribed thereto in the Federal Tax Act and the Ontario Act, which for each series of shares includes Canadian dollars in cash or on deposit with qualified Canadian financial institutions, debt obligations of or guaranteed by the Canadian federal government, debt obligations of provincial and municipal governments, Crown corporations, corporations, and trusts listed on prescribed stock exchanges, guaranteed investment certificates issued by Canadian trust companies, and qualified investment contracts.

Investment Strategy

To seek to achieve its investment objective, the ROI Fund endeavors to: (i) invest a minimum of 60% of the capital raised from the sale of Class A Shares in a diversified portfolio of businesses; and (ii) invest the balance of the net proceeds in reserves such as short-term government debt and corporate debt obligations. Although Class A Shares, Series IV – Private Placements will not invest in publicly-traded equity securities, it may acquire such securities as a result of in-kind payments of interest and capital on permitted debt obligations. As the Return On Innovation Advisors Ltd. (the "Manager") believes that a critical component of portfolio risk management is diversification, the ROI Fund will diversify its investments. In all cases, the ROI Fund will seek to invest in companies with established products, customers, distribution channels and who have demonstrated solid financial results as evidenced

by historical cash flow, or the clear ability to generate cash flow in the near-term. The ROI Fund will not invest in speculative business models, early stage high-tech businesses or start-ups.

Risks

The Fund's investments are primarily subordinated, secured debentures. The fair value of these securities is influenced by interest rates. As such, interest rate risk will always be a factor in this Fund. Credit risk also remains a factor.

There are risks associated with investing in these debentures. A long-term investment horizon is recommended when investing in the Fund.

Investments are made with the expectation that they will be held to maturity. This diminishes the impact of economic cycles and market volatility.

The Fund does not invest in publicly traded equity securities and does not have exposure to foreign securities. The Class A Shares are speculative in nature and an investment in Class A Shares is appropriate only for investors who are prepared to hold their investment in the Fund for a long period of time and who have the capacity to absorb a loss of some or all of their investment.

Valuation

The Fund estimates the fair value of its assets for which there is no published market. The valuation process is based on inherent uncertainties and the resulting values may differ from values that would have been used had a ready market existed for the investments. Measurement of fair value on an ongoing basis involves considerable judgment. Estimated fair value is determined using appropriate valuation methodology after considering: the history and nature of the business; operating results and financial conditions; independent valuations of the business; contractual rights relating to the investment; public or private market comparable

transactions and results multiples, where applicable, and other pertinent considerations. As at December 31, 2019, there were no assets held for which there is not a published market.

For further discussion on risk issues please see the notes to the financial statements.

Results of Operations

The portfolio advisor of the Fund is Return On Innovation Advisors Ltd. The commentary that follows provides a summary of the results of operations for the period ended December 31, 2019.

Financial Performance

Total net assets at December 31, 2019 were \$15,912,224, down from \$24,592,261 at the prior year end.

During the year ended December 31, 2019, the Fund had redemptions of \$8,002,198 and a decrease in net assets from operations of \$677,839. The Fund is not accepting new subscriptions.

Redemptions continued to be high, but not unexpected. Investors cannot redeem units without penalty for eight years. Once the eight-year hold period is finished, they may redeem units without penalty. The high levels of redemptions reflect the end of the holding periods and consequent redemptions. The Fund continues to hold ample liquid portfolio to manage the liquidity requirements relating to these redemptions.

Investment Performance

For the year ended December 31, 2019, the Fund returned -4.45%. Please refer to the past performance section for additional performance information.

Since December 31, 2018, the Fund had a decrease in net assets attributable to holders of redeemable shares of \$677,839. The decrease was

composed of a \$766,319 loss from operations and \$88,480 in realized and unrealized gains on investments. The realized and unrealized gains on investments are made up of \$810,123 in net realized losses on investments and a \$898,603 net change in unrealized gains.

The Fund invests in TSX listed debentures. The market purchase price may be lower or higher than the par value. Typically, a debenture will mature or be repaid early by the issuer at par and the Fund will experience a gain or a loss on its investment if it purchased the debentures at a discount or a premium to par respectively. The Fund will also receive interest on its investment. The income from the issuer offsets the anticipated loss if the market price is above par.

The Manager of the Fund evaluates the coupon and the yield to maturity in assessing the likelihood that the Fund will generate a net gain by investing in the debenture and receiving the interest income and the potential gain or loss. Generally, the Fund will hold the debentures until maturity or when they are repaid by the issuer. The Fund may sell a debenture in the event the Fund needs to raise cash to fund operations of the Fund or the credit of the debenture is anticipated to deteriorate materially prior to maturity.

The realized and unrealized losses during the year can be attributed to a couple of factors. The biggest negative impact on the portfolio involved one of the Fund's largest investments. As at December 31, 2018, The Fund owned a \$3,000,000 notional interest in Just Energy Group Inc. 6.75% debentures that were trading at \$96.13. During the year the company recorded impairments from operational issues in customer enrolment and non-payment of accounts receivable in the Texas residential market, and collection issues in the U.K. market. According to industry sources, during the second half of the year the Board of

Directors of Just Energy has been evaluating possible alternatives for the company, including a possible sale. In turn, the company also cut distributions to common shareholders and renewed senior credit lines with a view of preserving cash and liquidity while attempting to reverse the course of the company. By December 31, 2019 the 6.75% debentures had fallen in price to \$67.76 given the negative financial results and the unknown outlook for the company. Over the course of the year, the Fund sold its interest in the debentures for a weighted average price of \$76.03 excluding any interest the Fund would have received. Excluding interest received and trading costs, the Fund incurred a loss of approximately \$605,592 during the year. This was most of the Fund's unrealized and realized loss during the year.

The biggest positive impact on the portfolio involved the Fund's largest investment – Morguard Real Estate Investment Trust 4.50% Convertible Unsecured Subordinated Debentures that mature on December 31, 2021. The yield to maturity on the debentures declined to 3.84% from 5.98% during the year. As the yield to maturity went down, the price went up and the Fund incurred a \$389,031 realized and unrealized gain or a 5.47% gain in value. This was about half of the Fund's unrealized and realized gain during the year.

The Fund receives an anticipated net rate of return equal to the yield to maturity on the portfolio. The current weighted average yield to maturity for the liquid portfolio is 3.77% down from 6.61% at December 31, 2018. The market for the debenture portfolio is currently stable with the majority of the debentures trading at or close to par with a small risk premium over Government of Canada bonds. The Modified Duration of the debenture portfolio declined year over year from 2.50 years to 1.42 years reducing interest rate risk

within the securities portfolio should interest rates rise in the future.

As mentioned previously, the time to maturity is shortening for the debenture portfolio and this tends to translate into a lower yield to maturity and more stable debenture values. A shorter time to maturity tends to reduce the risk premium for riskier debentures since the overall impact of negative economic activity is typically muted since the debenture will be repaid at par sooner.

Investment Activity

At December 31, 2019 and 2018, the Fund had no venture investments remaining.

In the liquid portfolio, at December 31, 2018 the Fund held \$21,522,722 in convertible unsecured subordinated debentures (approximately 87.52% of the Fund) and \$3,314,374 in short-term investments (approximately 13.48% of the Fund). At December 31, 2019 the Fund held \$10,969,961 in convertible unsecured subordinated debentures (approximately 68.94% of the Fund) and \$5,088,746 in cash and short-term investments (approximately 31.98% of the Fund)

As at January 1, 2019 the Fund had invested \$8,245,201 in the following debentures, Northwest Healthcare Properties REIT, Series 'C', 7.25%, Just Energy Group Inc. 6.75%, Exchange Income Corp 5.25% and AG Growth International Inc., 4.50%. During the period all these securities were repaid by the issuer or sold in the secondary market by the Fund.

During the period the Fund sold approximately \$ 2,969,894 of the existing holdings in the Fund of Morguard REIT, 4.50%

The income of the Fund is comprised of interest income on fixed-income securities in the amount of \$763,544. The income from the securities portfolio was down year over year, as the portfolio size has decreased due to redemptions and to ensure there is liquidity on hand for

anticipated redemptions. In addition, the size of the securities portfolio has varied during the year as issuers have repaid some outstanding debentures prior to maturity. The Fund receives large inflows of cash from the repaying issuers and it takes time to reinvest that cash into new securities given the liquidity constraints of the debenture market.

Going forward, the portfolio advisor will only consider new venture investments when prudent in order to meet pacing requirements. Generally, available cash will be invested in public securities, which will provide flexibility and liquidity for the Fund in order to fulfill potential redemption requests in the future.

Fees and Expenses

Total expenses for the year were \$1,529,863.

The Fund's management expense ratio ("MER") was 8.16%. The comparable MER for the year ended December 31, 2018 was 7.68% (ignoring the expense recoveries in 2018). The MER increase was due to a contractual increase in trailing commissions paid and to the fixed expenses being spread over a declining NAV. These were somewhat offset by a decrease in commission finance fees paid by the Fund.

Recent Developments

Investment Pacing Requirements

The Fund is required to invest a prescribed portion of its assets in eligible venture investments as defined in the Community Small Business Investment Funds Act (Ontario) and the Income Tax Act (Canada). If the minimum level of

qualifying venture investments is not met as at the calendar year end, the Funds may be subject to defined taxes and penalties. As at December 31, 2017 and 2016, the Fund was not in compliance with the investment pacing requirement. The Fund returned to compliance in February of 2018. As such, the investment level taxes relating to 2016 and 2017 were recognized as an expense recovery in 2018 in the Statements of Comprehensive Income (Loss).

As at December 31, 2019 the Fund was in compliance with the investment pacing requirement.

Coronavirus

The impact of the coronavirus ("COVID-19") outbreak on the financial performance of the Fund's investments will depend on future developments, including the duration and spread of the outbreak and related advisories and restrictions. These developments and the impact of COVID-19 on the financial markets and the overall economy are highly uncertain and cannot be predicted. If the financial markets and/or the overall economy are impacted for an extended period, the Fund's future investment results may be materially adversely affected.

Related Party Transactions

The Manager, Advisor and ACTRA Toronto Performers (the "Sponsor") are deemed to be related parties. Please refer to the section titled "Management Fees," which outlines fees paid to these related parties.

Financial Highlights

The following tables show selected key financial information about Series IV of the Fund and are intended to help you understand the series' financial performance.

Class A Series IV Net assets attributable to holders of redeemable shares per unit^{1,2,3}	Dec 31 2019	Dec 31 2018	Dec 31 2017	Dec 31 2016	Dec 31 2015

1. This information is derived from the Fund's audited annual financial statements, prepared in accordance with International Financial Reporting Standards ("IFRS").

2. The increase (decrease) from operations is based on the weighted average number of shares outstanding during the financial year. Distributions per share are based on the actual number of shares outstanding at the relevant time. This table is not intended to be a reconciliation of beginning to ending net assets per share. Distributions were paid in cash and either received in cash by the shareholder or reinvested in additional shares of the Fund.

3. This information is provided as at December 31 of the year shown.

4. Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the year. In 2018, there was an unusual expense recovery in the Fund, which led to a lower management expense ratio. Excluding this recovery, in 2018 the management expense ratio would have been 7.68%.

5. The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.

6. The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

Advisor, Sponsor and Management Fees

The Manager has been retained by the Fund to manage the Fund's investment portfolio. As compensation for the services to be provided for and on behalf of the Fund by the Manager, the Fund has agreed to pay to the Manager an annual advisor fee of 1.0% of the NAV of the Fund.

The Fund pays the Sponsor (ACTRA Toronto Performers) an annual fee of 0.25% of the NAV of the Fund, calculated and paid monthly in arrears.

The Manager has been retained by the Fund to develop and implement all aspects of the Fund's sales, marketing, distribution and communications strategies; organize the retention and supervision of service providers; develop and refine the investment strategy; and to manage the ongoing business and administrative affairs of the Fund. As compensation for the services, the Fund has agreed to pay to the Manager an annual management fee of 2.3% of the Series IV NAV of the Fund. The major services paid by the management fees by series expressed as an approximate percentage of the management fees are summarized as follows:

SERIES	IV
Dealer Costs	5.34%
Other Fees*	94.66%

* Includes general and administration fees, marketing fees, and profit.

To the extent that management fees did not fully cover the cost of services provided to the Fund, the difference was funded directly by the Manager.

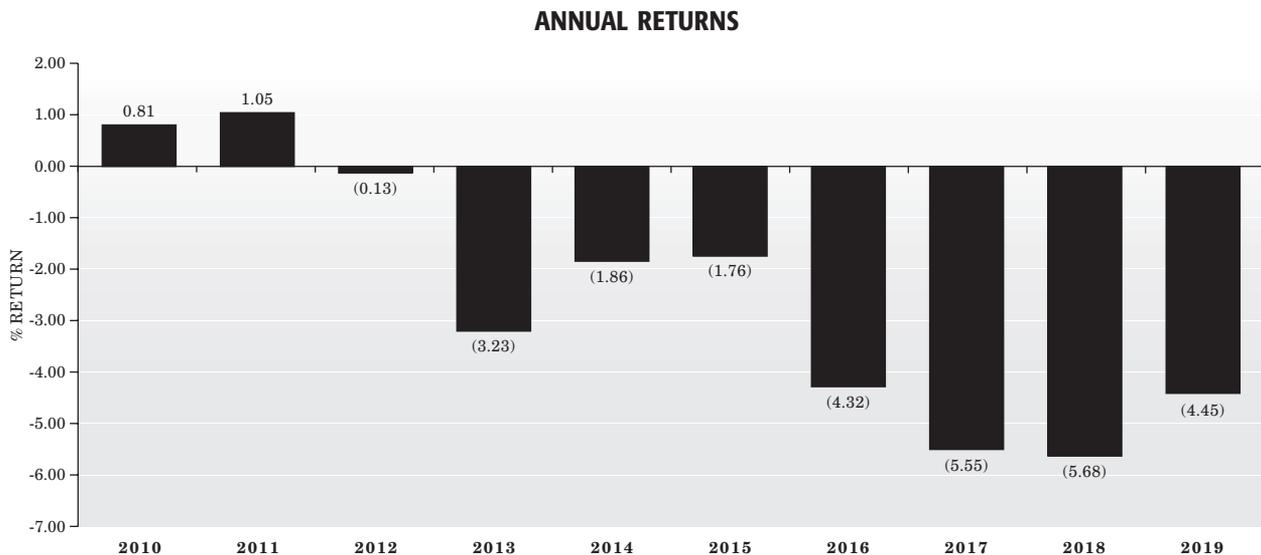

The Manager has also been retained by the Fund to pay sales commissions on behalf of the Fund and provide services in connection therewith. As compensation for these services, the Fund has agreed to pay to the Manager an annual financing fee of 0.4% of the NAV of the Fund, as well as an annual base financing fee equal to the aggregate of 1.5% of the original purchase price of Class A Shares, Series IV (that remain issued and unredeemed, provided that such fee ceases for any such shares retained for more than eight years).

Past Performance

The performance presented below is historical. The past performance information shown includes changes in security value; assumes the reinvestment of all dividends in the periods shown in additional shares of the Fund; and does not take into account sales, redemptions, dividend or optional charges, or income taxes payable by any investor, which would have reduced returns. It is important to note that past performance of the Fund does not represent how well the Fund will perform in the future.

Year-By-Year Returns

The following bar chart shows the Fund's annual performance for each of the years shown and illustrates how the Fund's performance changes year to year. The chart shows in percentage terms, how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year.

Annual Compound Returns

The table below summarizes the ROI Fund's historical compound total returns at December 31, 2019. As a basis of comparison, we have provided the returns of the Canadian Investment Funds Standard Committee Retail Venture Capital Index ("CIFSC Retail Venture Capital Index") and the S&P/TSX SmallCap Index as at December 31, 2019. The CIFSC Retail Venture Capital Index is an equally weighted average of mutual funds within the Labour-Sponsored Investment Fund asset class. The S&P TSX SmallCap Index is a portfolio index of the Small Cap market segment of the Canadian equity market.

COMPOUND RETURNS - %	5 YEARS	3 YEARS	1 YEAR
Series IV	(4.36)%	(5.23)%	(4.45)%
S&P/TSX Small Cap Index	3.18%	(0.87)%	15.84%
CIFSC Retail Venture Capital	(5.38)%	(4.15)%	(6.96)%
